No. 873

30 years of AIDS prevention

Elements of protection

Letter "H" is equal to the surface tariff of a letter up to 20 gram abroad.

Historical reference: On June 1981 American scientists informed about the first clinical case of the disease that later was called the acquired immune deficiency syndrome (AIDS). In 1983 they found out the cause of the disease human immunodeficiency virus (HIV). 30 years later the epidemic of AIDS has spread all over the world. More than 60 million people were infected with HIV.

As on March 1, 2011 in the Republic of Belarus they recorded 11929 HIV cases, among them children — 194 cases.
