No. 1248

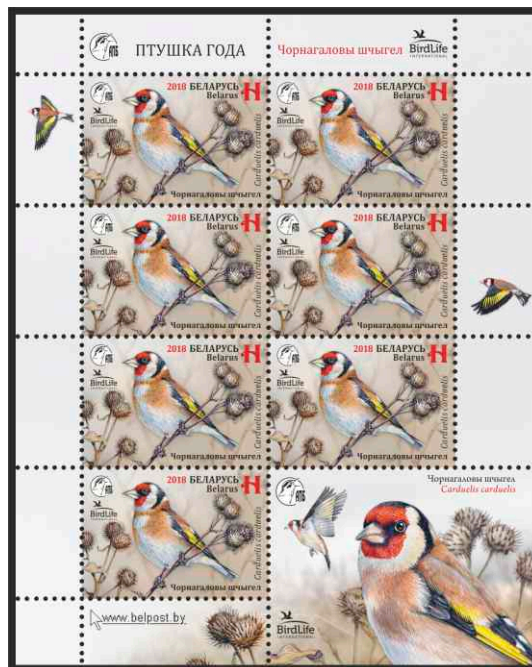

European goldfinch

H

Element of protection

Letter "H" is equal to the surface tariff of a letter up to 20 gram abroad.

The 20<sup>th</sup> Congress of the public organization "Ahova ptushak Batskaushchyny" (Protection of Homeland Birds) declared the European goldfinch the bird of the year 2018 in Belarus.

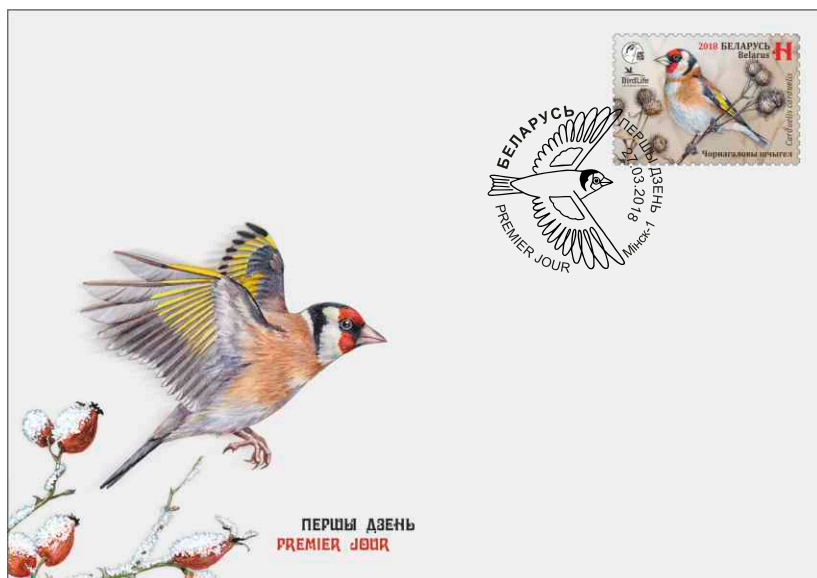

The European goldfinch is found throughout the territory of Belarus. It nests on forest edges, alleys, in parks, squares, gardens and cottage villages. It eats mainly seeds, including burdock, wormwood and alder, and feeds its chicks mainly with insects and spiders, which are collected both on trees and on the ground.

In winter, goldfinches are found in various wastelands, vegetable gardens and flower beds near dwellings. The birds get together in flocks. The flocks are small: they consist of 5-10 birds, rarely of 30 ones. In April they break up into separate pairs.

The number of the European goldfinch in Belarus is stable and is estimated at 180-200 thousand pairs.

The project was prepared with the assistance of the public organization "Ahova ptushak Batskaushchyny".

The stamp contains the logos of the global partnership of conservation organizations "BirdLife International" and the Belarus public organization "Ahova ptushak Batskaushchyny" (APB).

Colour of the postmark - black.

Special **postmark** and **FDC**  
painted by A.Mityanin,  
designed by M.Vitkovskaya.

A special cancellation on FDC will be carried out at the post office No.1 of Minsk (shop "Philately", 16 Moskovskaya street) on the stamp issuing day.

A maximum card "European goldfinch" will be issued too. Artist A.Mityanin. Design by M.Vitkovskaya.
